

### Masport Manway

Each Masport Manway incorporates a one-piece, low-profile flanged dome lid design to eliminate possible leaks found in two-piece lid designs. The cut-resistant nitrile gasket keeps materials from collecting in the retaining seat. Durable ductile iron wing nuts with captive wear washers have a wide span to easily hand tighten or loosen. A stepped shoulder design on the wing nut provides a positive lock into the lid closure bracket for superior lid-to-weld collar alignment and safety. All weld collars are constructed of 1/4" thick hot rolled steel for extra long life. Each Masport Manway is rated for 15 P.S.I. working pressure and expertly mig welded in close tolerance fixtures for consistent high quality.

Masport Manway

Typical Truck Set-Up (Configurations May Vary)
